Regarding Family Members In Treatment Areas...

Dearest Patients & Parents,

For patient safety and privacy, we kindly ask all family members to wait in our waiting area during appointments. Because visits often include x-rays and the use of other sterile materials, it is safest for the patient to be in the operatory unaccompanied. In addition, allowing our staff members to focus solely on the patient without distraction ensures the highest quality of workmanship. We feel every patient deserves our undivided attention. We will brief desired family members on treatment recommendations and findings. Dr. Bohan is always available to families in the consultation room to address any concerns.

We sincerely thank you for your cooperation!
